Wednesday, 25th November in Crusheen Community Centre at 8.15 pm

Cappaean,
Knockaloaghan,
Drumbaniff,
Knocknamucky &
Ballyscanlan

Wednesday, 2nd December in Ballinruan Community Centre at 8.15 pm

Ballygassan,
Gortaniska,
Doon,
Knockmeal,
Drumcore &
Bunahow

Subject :16 DAYS OF ACTION OPPOSING VIOLENCE AGAINST WOMEN
Date: Wed, 25 Nov 2009 12:33:30 +0000

One in three women worldwide face abuse, violence and rape every day. In no country of the world are women free from this fear and terror. In Ireland, it is estimated that 213,000 women are living with severe abuse from their boyfriends, husbands and partners. The 16 Days Campaign is an international campaign that started in 1991. Since then, more than 2,000 groups in 154 countries have taken part. The 25th of November (UN Day Opposing Violence against Women) and the 10th of December (Human Rights Day) were chosen to symbolize the link between violence against women and human rights abuses and to highlight that, today, women and girls are subjected to many forms of human rights violations solely on the
basis of their gender. **The Clare Womens Network** in collaboration with photographer **Martina Cleary** have developed a poster campaign to highlight this 16 Days Campaign. The posters depict only some of the abuses which women face everyday in Ireland and globally and are accompanied by facts relating to violence against women. A poster will be released everyday for the 16 Days Campaign.

**16 Days Campaign**

UN Climate Change Conference
Where: Copenhagen, Denmark
Action: Events/Conf/Fairs

Description
With the current global climate change agreement - the Kyoto Protocol - expiring after 2012, there is a pressing need for a new binding agreement. This is what countries attending the conference hope to achieve.

The Danish Government, which is hosting the conference, hopes to have as broad a range of countries as possible and include a reduction in man-made greenhouse gases. It is also striving to include respect for the environment, living standards and long-term security of energy supply.

Climate changes in themselves are nothing new. What is new is that man-made emissions have led to the volume of greenhouse gases in the atmosphere being increased massively, and that global warming is happening significantly faster than previously. The Danish Government therefore believes that 2009 could be the final year to reach agreement on the Post-Kyoto era.
